H09	H10	Dominant Yellowcheek – All	H11	H12
H13	H14	Recessive Yellowcheek (“Goldcheek”) – All	H15	H16
SECTION R – RARES				
R01	R02	AOV/AOC Rares – All	R03	R04

Cockatiels with tick spots on the head, neck or body must be shown in the Split or AOV classes. Pied markings appear less than 75% yellow and/or white wash; Heavy Pied - between 76% to 98% yellow and/or white wash; Dark-eyed Clear 99% to 100% yellow and/or white wash. Saddleback Pies include markings such as symmetrical saddle patterns on each side, or a solid band, ring, or necklace elsewhere on the body; Tri-color Pies are Normal Pies appearing as a color combination of Dark Grey, Brown and White.

AOV Whiteface DO NOT include Dilute, Cheek patch, or Rare Classes. For example, Whiteface Dominant Silver is under Dilutes “Dominant Silver AOV.” All Cheek Patch Series cross mutations must be shown in the Cheek Patch section. For example, a Sex-linked Yellowcheek Recessive Silver is under the Cheek Patch Series “Sex-linked Yellowcheek – All.” AOV/AOC Rares include new mutations or mutations not listed. Some incorrect terminology is contained within parenthesis next to the correct (nomenclature) class.
